The soy bees and the antonimi are useful to know because they improve reading and writing skills. And because words represent thoughts, it can be believed that they allow students to understand the world on a deeper, richer level. It is important to know that the ayonos are not words that have the same meaning, but words that have similar meanings. This means that by learning the same name, pupils learn to distinguish between nuances of meanings. This allows them to be more accurate. In addition, by learning antonomov, students learn logical contradictions of important words, thus increasing the general knowledge of the language. In the first set of our worksheets below, students must choose the best antonom for a given word. Each worksheet has 10 questions about the antonimis. Start-level worksheets have 3 answer choices. Mid-level worksheets have 4 choices of answers. Advanced-level worksheets have 5 response decisions. Advanced level worksheets test the most common 200 words used on and GRE tests. On the second set of worksheets, students must choose the best by one or the best for a given word. Each worksheet has 6 the namesake questions, followed by 6 questions from Antonomis. Start-level worksheets have 4 choices of answers. Intermediate and advanced have 5. Advanced-level worksheets test the most common 200 words used on SAT and GRE tests. It may help you to see our Verbal Adjudication Techniques page (found at the bottom of this page). This worksheet lists several strategies that will allow you to answer the names/antonim questions with a higher success rate, including questions where you are unsure about specific word definitions. We also recommend that you use tesaurus to learn word definitions, especially if you are studying for a SAT or GRE test. Thesaurus allows you to familiarize yourself with the family of the synoots and antonims associated with a given word. In terms of the test, this may prove more valuable than knowing the precise definition of individual words. On these worksheets, students are tested on their ability to recognize antonom or the opposite of a word. Although it helps to know the word meanings, in most cases this is not entirely necessary. Instead, students can rely on their use of logic and verbal ability to answer questions correctly. It may help you to view our verbal adjudication techniques below. This information provides several strategies that will allow you to answer the names/antonim questions with a higher success rate, including questions where you are unsure about certain word definitions. Oh hey, and remember: the following samples are taken from our sister site, ReadTheory. It is a powerful educational tool created to improve reading understanding for all ages and levels of ability. In these worksheets, students are tested for the ability to recognise a sinonima (a word that has almost the same meaning) or antonom (a word meaning) of a word. While it helps to be knowledge of meanings, this is not entirely necessary in most cases. Instead, students can rely on their use of logic and verbal ability to answer questions correctly. Techniques of solving the same time/Antonyms Questions 1) On difficult-to-anonym i/y/antonim issues, beware of the trick of choice. Can you spot the trick in the next case? Choose the best antonom. RESTIVE: A) patient B) rigorozen C) The y'r G) active E) Careful Word, restive, is complicated because it sounds like it has something to rest. That's why D would be active. But it's a trick. Restive actually means restless. So the right answer is patient, good for restlessness. It is useful to familiarize yourself with complex words such as restive, as they are usually tested on SAT and GRE. 2) Consider a positive and negatively charged selection of responses. A negative or positive charge can be linked to almost every word given. Try to determine whether each word in the following list has a positive (+), negative (-), or neutral (±) charge. Choose the best sonony. MALIGNED: A) beneficent B) magnanimous C) downtrodden D) destitute E) elegant For example, we try to find the best co-ord for the word maligned. So we should find out his charge first. Prefix, mal is usually used in negatively charged words. Therefore, the answer will be entirely positive. Let's go through the list, see how each word is filled. A) Benevolent (+) B) Magnificent (+) C) Downtrodden (-) D) Destitute (-) E) Elegant (±) After each labeling, we are left with two words that are positively charged: benevolent and magnificent. Even if you don't know the meaning of any choice of answers, you've narrowed your choices to two and you're left with a 50% change in the correct answer. This is a quick technique that can be very useful in trying to answer a question with multiple words about what you are unsure about. 3) Eliminate the answers of choices that are not clear. This technique only works on antonom questions. So this is an excellent technique to use on GRE because it contains only antony questions (it does not contain any sonony questions). Consider the words rounded or striped. None of these words have a clear word. Although almost every word is soothing, remember that not all words have antonims and eliminate them first. 4) Eliminate the choices of answers that are a very osiothiony. Noticing the same name within the choice of answers can be valuable because it allows you to narrow down your chances of eligible answers. If two answers have very similar meanings, then the correct answer is too ambiguous. Therefore, these decisions can be eliminated. SAT/GRE are difficult tests, but they always represent one choice of answers that is clearly correct. Check to see if you can eliminate two answer choices from the following example. Choose the best antonom. FOMENT: A) Modify B) Lighter C) Checking D) Mollify E) To Satisfy Words To Mitigate and are a very soothing sonony. Both mean to reduce or soften in pain or intensity, make it less severe. This left only three remaining options for an answer. 5) Try to link the word to a known context. The words on SAT/GRE are tested for good reason: they are very effective. In this case, they are included in a number of proverbial phrases. Note the following examples: Gail force winds, The Village Advocate, Test your mettle, Road to Perdition, Patience is a virtue, Abject poverty, Survived unharmed. 6) Use your knowledge of Romanesque languages. The roots of many SAT/GRE words have similar meanings in foreign languages. For example, the Spanish word means little bad. This is a common root for many negatively charged words: malicious malignant malapropos malediction malicious malicious malicious maliciousness In addition, the Spanish word bueno means good. It is also a common root for many positively filled words: the soothingly benevolent benefactor of benign But, be careful. Sometimes questions will try to deceive the test taker by incorporating roots into words that believe in their true meaning: bellicose restive noisome authentic postponement craven precipitate prosaic
